Kochi, Kerala, India | +91 9074966721 | arjunajith440@gmail.com | linkedin.com/in/4arjun | github.com/4arjun

SUMMARY

Final-year Computer Science undergraduate and full-stack engineer with production experience shipping to a live platform used by **96K+** creators. **Top 15 contributor** to Gumroad's open-source codebase, with **25+ merged pull requests** spanning page migrations to Inertia.js, a **150x performance optimization**, and root-cause fixes for race conditions and payment failures. Proficient across **React**, **Inertia.js**, and **Django**, with strong algorithmic and problem-solving foundations.

WORK EXPERIENCE

Open Source Software Engineer — Gumroad

Aug 2025 – Feb 2026

- Migrated **5 major creator-facing pages** (Discover, Library/Reviews/Wishlists, UTM Analytics, PDF Reader, Video Streaming) from legacy Rails + React-on-Rails to **Inertia.js**; deferring expensive props on the Discover page cut initial load time from **~5 seconds to near-instant**.
- Reduced computational overhead by **150x** by replacing $O(n)$ array lookups with a **memoized Map** for file references, cutting **~90,000 comparisons** to **~600** on a 300-file product and eliminating render-blocking on the content editor.
- Diagnosed and fixed a **stale-closure race condition** that let a cancelled file upload silently block product saves and navigation indefinitely — a **community bounty-earning fix (\$100)**.
- Restored payout access for creators in **Kazakhstan** by identifying a Stripe cross-border restriction and rerouting payouts through **PayPal**, resolving persistent bank-transfer failures.
- Resolved multiple UI regressions from a large-scale **SCSS-to-Tailwind CSS** migration across the dashboard and product pages — including a **bounty-earning fix (\$100)**.

Full Stack Developer Intern — WNE3

May 2024 – Aug 2024

- Built and deployed **WNE3's website** on **Microsoft Azure**, with a **React** frontend and a **Django** backend.
- Built a waitlist signup flow capturing name, phone, and details, with the Django backend integrating the **Google Sheets API** to write submissions directly into a shared spreadsheet.
- Built the platform's **authentication microservice** using **NextAuth**, integrating **Google OAuth** and **X (Twitter) OAuth**.

PROJECTS

Vitalia.ai — AI-powered nutrition and health insights app | github.com/4arjun/Vitalia.ai

- Engineered **Django REST APIs** for product analysis, structuring ingredient, nutrition, and allergen data retrieved via the **OpenFoodFacts API**.
- Implemented image and barcode processing using **OpenCV** and **Pyzbar** to extract product identifiers from uploaded images.
- Integrated **OpenAI APIs** to generate **AI-powered ingredient-risk insights** from structured product data.

AmpPay — Real-time energy monitoring platform | github.com/4arjun/AmpPay

- Engineered a **Django** backend for energy telemetry, ingesting **Arduino** sensor data over serial and HTTP and storing timestamped current, power, peak-power, and kWh readings via the **Django ORM**.
- Developed a **predictive billing system** using **Pandas** and **scikit-learn**, applying **Linear Regression** on historical consumption data to forecast usage and estimate upcoming electricity bills.

TECHNICAL SKILLS

Languages & Frontend: Python, JavaScript, React, Inertia.js, Next.js, Tailwind CSS

Backend & Auth: Django, Django REST Framework, REST APIs, OAuth 2.0, NextAuth, Google Sheets API

Data & ML: Pandas, scikit-learn, OpenCV

Databases & Infra: PostgreSQL, Kafka, Docker, Git, Postman, Microsoft Azure

Core Concepts: Data Structures & Algorithms, OOP, Operating Systems, Networking, Concurrency, System Design

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Aug 2023 – Jul 2027

Government Model Engineering College, Kochi, Kerala, India — CGPA: 8.68 / 10

ACHIEVEMENTS & CERTIFICATIONS

- Top 15 contributor** to Gumroad Open Source by merged PRs — spanning performance, reliability, and payments.
- Solved **650+ DSA problems** on LeetCode.
- Winner, MECLABS 2024 — **Ranked 1st** among 100+ teams across Kerala.
- Winner, BitWise Coding Competition — **Secured 1st place** among 200+ participants.
- Millennium Fellow** — Selected for a global leadership program by the UN Academic Impact (UNAI) and MCN.
